03 // OFFICERS AND FOUNDERS (FULL DOSSIER)

Officers and founders: Vektor Cloud Inc.

Corporate continuity, prior directorship and entity-forfeiture filings, public package/repository provenance, and sanctions/federal court standing for key officers of Vektor Cloud Inc. (included in Full Vendor Dossier). Independence: not commissioned or paid by the subject.

EXECUTIVE VERDICT AND KEY FINDINGS

- **What checks out:** Verifiable technical leadership (active TypeScript and cloud delivery across `vektorcloud-hq` and `@vektorcloud/sdk`); both officers (`Daniel Lindholm`, CTO; `Sarah Chen`, CEO) return clean OFAC, SAM.gov, and federal court records.
- **What is fragile:** Omitted prior Texas LLC (`Northbay Systems LLC`, forfeited `2022-11` for overdue franchise filings) tied directly via build/npm metadata, expired legacy domain (`northbaysystems.example`), and a single-maintainer bus factor (`91%` of public SDK commits from 1 author vs 28 claimed engineers).
- **What closing it costs:** Add IP assignment warranty from `Northbay Systems LLC` into `Vektor Cloud Inc.` in the MSA, confirm on-call engineering backup coverage, and verify npm/cloud/DNS admin migration with hardware MFA (`<1 day` vendor confirmation).

VERDICT

CONDITIONAL

CONFIDENCE: HIGH

COMPANY	OFFICERS REVIEWED	PRIOR ENTITIES	CODE CONTINUITY	SOURCES REVIEWED	SANCTIONS / COURTS
Vektor Cloud Inc. (DE)	2 (CTO + CEO)	1 forfeited TX LLC	91% single author	10 public records	CLEAN

SAMPLE REPORT NOTICE: Illustrative vendor case (`vektorcloud.example`, RFC 2606) matching paid Kybexo structure and public-record methodology. Prepared 2026-11-20 / Hosted copy deletes 7 days after first open; downloaded files are permanent.

01. Officer and affiliated entity summary

OFFICER / ENTITY	CORPORATE ROLE	JURISDICTION / STATUS	OBSERVED PUBLIC CORPORATE RECORD
Daniel Lindholm	Co-founder, CTO	US (DE / TX filings)	Sole managing member of prior `Northbay Systems LLC`; primary maintainer of `@vektorcloud/sdk` (`91%` of commits).
Northbay Systems LLC	Prior founder entity	Texas / Forfeited (`2022-11`)	File `0803419210` (formed `2019-06-14`); placed in `Forfeited Existence` for overdue state franchise filings.
Sarah Chen	Co-founder, CEO	US (Corporate role)	Commercial leadership; no adverse officer, sanctions, or federal court records observed.

02. Corporate continuity and bus-factor observations

MED **P-01: Undisclosed Texas LLC forfeited for overdue franchise tax filings** — Texas Comptroller / File 0803419210

Observed: Texas Secretary of State and Comptroller public franchise-tax records list Daniel Lindholm as sole managing member and registered agent of `Northbay Systems LLC` (Austin, TX), formed `2019-06-14` and placed in `Forfeited Existence` on `2022-11-18` under Texas Tax Code §171.309 for failure to file its annual Public Information Report and franchise tax return.

Risk impact: Administrative forfeitures are common when solo consultancies wind down without formal dissolution, but omitting the entity while presenting `Vektor Cloud` as operating since 2020 overstates organizational maturity by four years.

Action: Confirm during diligence that all software IP created prior to March 2024 was cleanly assigned from `Northbay Systems LLC` into `Vektor Cloud Inc.`

Source: mycpa.cpa.state.tx.us (Texas Comptroller Taxable Entity Search)

MED **P-02: Expired legacy consulting domain still referenced in production build and package metadata** RDAP + npm Registry + Build Artifact

Observed: Public RDAP records show `northbaysystems.example` expired `2024-09`, while `@vektorcloud/sdk` package metadata (through `v0.3.8`) and production source map metadata (`KX-SAMPLE-02`, `F-01`) still reference `daniel@northbaysystems.example`. Archived 2021 consultancy bio (`web.archive.org`) confirms product continuity.

Risk impact: Allowing a prior corporate domain referenced in package maintainer records and build artifacts to expire creates software supply-chain continuity risk.

Action: Confirm all npm maintainer accounts, cloud root accounts, and DNS administrative contacts have migrated cleanly to `vektorcloud.example` with hardware MFA enforced.

Source: rdap.org / npmjs.com

MED **P-03: High single-maintainer bus factor in public engineering repositories** GitHub Org API + npm Registry

Observed: Public GitHub organization `vektorcloud-hq` lists 3 active members, and `91%` of commits to `@vektorcloud/sdk` (`167/184` commits) originate from a single author (`@dlindholm-dev`). Internal code quality cannot be assessed without private repository access, but public commit concentration contradicts a claimed 28-engineer organization.

Risk impact: If core architecture knowledge sits with one founder-engineer, any unavailability or turnover creates immediate delivery and incident-response risk for a `$120,000` annual contract.

Action: Request a written breakdown of full-time vs contractor engineers covering production on-call and verify named secondary technical escalation contacts in the SLA.

Source: github.com / npmjs.com

LOW **P-04: Corporate timeline overlap between prior consultancy and stated founding year** State Filings vs Commercial Deck

Observed: Texas state filings show `Northbay Systems LLC` active from `2019-06` through `2022-11`, overlapping the RFP's stated `2020` founding of `Vektor Cloud` (incorporated in Delaware `2024-03`).

Risk impact: Common when consulting work transitions into a standalone product, but clean intellectual property chain-of-title should be documented contractually.

Action: Include standard IP ownership and non-infringement warranty covering pre-incorporation code in the Master Services Agreement.

03. Sanctions, debarment, and federal court screening

OFFICER SCREENING (VERIFIED CLEAN)	
OFAC / GLOBAL SANCTIONS	CLEAN No matches across US OFAC SDN / BIS / EU / UN / OpenSanctions (`2026-11-20`).
SAM.GOV DEBARMENT	CLEAN No active federal procurement exclusions or debarments in `sam.gov`.
FEDERAL COURT DOCKETS	CLEAN No civil, bankruptcy, or criminal federal docket matches across DE, CA, and TX districts (`CourtListener` / RECAP).

04. Primary public source ledger and method

ID	PUBLIC SOURCE / REGISTRY	SCOPE REVIEWED	OUTCOME	REFERENCE
0-01	Texas Comptroller	`Northbay Systems LLC` (`0803419210`)	Forfeited (`2022-11`)	cpa.state.tx.us
